

## "KiwiGrip!" - Kiwi Magic for your decks.

The New Zealand yachting machine is shrouded in mystery known as Kiwi Magic. What is the magic behind this tiny country's incredible success? One secret is now out of the bag: **KiwiGrip** deck coating. This amazing product has been affording Kiwi yachtsmen a safe, stable footing for over 15 years.

**KiwiGrip** is a revolutionary, durable, non-skid coating that comes out of the can like yogurt but spreads quickly and easily with a patented roller, offering a beautiful, consistent, grippy texture. By varying the application technique, the texture can be adjusted from "fine" to "aggressive."

What's so special about **KiwiGrip**? Unlike other coatings, **KiwiGrip** was developed by a yachtsman for yachtsmen. It's not just another industrial product stumbling upon a marine application. Consider the following features: very hard yet elastic, durable, homogeneous surface;

low-glare, IR reflective finish; homogeneous color - won't wear

through to expose filler materials; available in four standard colors or any custom color, perfect for do-it-yourself projects: rolls on quickly and easily; one-coat application; cures in 24 hours; cleans up with soap and water; non-toxic, no volatile solvents; easy recoat: just clean the old and roll on the new; no masking required!

Dial in the perfect texture for your application, apply over wood, fiberglass, or metal (following proper primers), it rolls on nicely over other worn non-skid surfaces, complete, detailed "how-to" instructions are available online.

As a homogeneous material, **KiwiGrip** doesn't suffer the problems encountered with products filled with sand, walnut shells, beads, rubber fleck, or other fill-

ers. These coatings tend to wear through and the fillers fall out leaving an unsafe deck that's hard to clean and even harder to recoat. As a roll-on product, **KiwiGrip** is considerably faster and less expensive to apply. Add safety and fun this season with a little bit of Kiwi Magic!

**KiwiGrip** is available through Pachena, LLC. 11025 Lakeside Avenue, NE. Seattle, WA 98125. 206-579-4017 or [www.pachena.com](http://www.pachena.com).
